

FOREWORD

This journal is trilingual.

We are excited to present the *Journal of Latinamerican Sciences and Culture (JLASC)*, an in-depth look at the Latinamerican academic past, present and future. This journal is the result of extensive research and consultation with educational members, as well as Latinamerican scientists around the world.

Our journal focuses on a set of tangible standards that are designed to be used in Science and Technology. These benchmarks will ensure *JLASC* will deliver sustainable, responsible, and far-reaching effect within the community of scientist and researchers who want to share their work with the society.

We present the first volume dedicated to education in Latin America. We hope you enjoy reading about the past, present and future of the education in Latin America.

International Advisory Board

JLASC

EXECUTIVE SUMMARY

The *Journal of Latinamerican Sciences and Culture (JLASC)* is an attempt of scientist, and researchers to create a state-of-the art, next-generation journal with applications in different areas of science, technology, education, and culture.

On behalf of the Editorial Board of *JLASC*, we invite global contributions to the Journal, the open access characteristic of *JLASC* will allow more authors to make their research visible and certainly create opportunities of communication, collaboration, and development.
